Excel: Creating a Basic Dashboard	<i>Aug. 2022</i>

PROJECTS

Otoscopia (Tele-Otology Mutli-Platform Application)

- Flutter-based mobile app for ear health screening with Appwrite backend
- HIPAA-compliant and currently used by 100+ patients across 5 schools
- Configured DNS, firewall, and virtual machine deployments via Cloudflare

College Attendance System

- React Native app with QR/Barcode-based check-in system
- Real-time sync and analytics via Firebase

Marketplace Application

- Offline-first Flutter marketplaces using Hive and Isar
- Designed for low-bandwidth communities

Aegistree (Leaf Disease Scanner)

- Mobile plant disease scanner using Flutter + TensorFlow Lite
- Deployed Firebase for cloud storage and authentication

CoffeeByte (Coffee Leaf Disease Scanner)

- React Native app with custom ML model integration
- Real-time disease classification with optimized UI

Lessitics (Company Marketing Website)

- Built SEO-optimized NuxtJS site; integrated Clarity for analytics
- Managed domain via GoDaddy; deployed via Vercel

Q-Academy (Startup Marketing Website)

- Startup site built with NuxtJS and Tailwind CSS
- Launched using Vercel; integrated performance tracking

SpotSell

- Filipino based alternative of Carousell
- Built using Flutter and Laravel frameworks

E-Bid

- Electronic Bidding System built using NuxtJS along and Tailwind v4
- Launched using Vercel platform

Q-Academy (Web Application)

- Web-App built using Nuxt v4, Tailwind v4, and Laravel Framework
- Launched using Vercel platform
